

Quantity Surveyor

SALARY £23K TO £35K PLUS BENEFITS

BASED IN HAVANT

Portsmouth Water is one of the leading water companies in England and Wales, consistently being ranked first in the industry for customer service and at the same time delivering the lowest customer bills, showing our commitment to continually improve in both technology and performance.

Water utilities have to constantly address new challenges and problems, caused by global warming, ageing infrastructure, population growth and higher quality living standards. Portsmouth Water is no different, including maintaining and improving our above and below ground assets to ensure continuous high standard water is supplied to our customers.

We are looking for a quantity surveyor to support our project managers and engineers, who has experience in the delivery and administration of NEC3 contracts, including frameworks, and who is committed to building and sustaining collaborative relationships through the right behaviours: promoting innovation, embracing change, encouraging honesty, fairness and pragmatism in an open and supportive relationship with our partners, operating at all times in a professional, considerate manner, and all with a positive attitude.

The new member of our team, working at all times within our values of excellence, respect and integrity, will be self-motivated, show initiative and commitment to positive, proactive health and safety. They will also need a full UK driving licence as the role may require travel to various Portsmouth Water sites. We are looking for a self-starter, potentially qualified to degree level, with experience of administering various NEC3 option contracts.

Other benefits include a group personal pension scheme, support for professional and academic development, on site gym, 25-31 days annual leave, family health insurance, car allowance and payments through the Company's Employee Ownership Trust.

Applicants should send a CV with 2 referees outlining salary expectations and including a brief sentence on why customer service is important in the water industry.
