

Project Manager – Water Efficiency

SALARY CIRCA £30K PLUS BENEFITS INCLUDING CAR ALLOWANCE

We are looking for someone who has the passion and skills to make a real difference

A key feature of our recently submitted business plan is the long term aspiration of reducing Per Capita Consumption (PCC) to 100 litres per person per day. This a challenging objective with our current PCC standing at 147 litres but one we believe can be achieved.

The role will be to help formulate our water efficiency strategy and then importantly take ownership on the delivery by project managing a range of initiatives, projects and events making a measurable reduction in average water use with our customers. An understanding of the process steps for planning and delivering initiatives to ensure they meet agreed objectives is essential.

The person will need to both understand and engage with all elements of the business and external stakeholders and customer contact points to see how customers' behaviour can be influenced to reduce PCC.

Being an effective communicator at all levels is a pre-requisite and ideally some experience in both producing / managing marketing campaigns and a background or interest in water efficiency.

Some plumbing knowledge and an understanding of WRAS would be advantageous

The successful applicant will be self-motivated with the ability to carry out their duties at all times in line with our values of Excellence, Integrity and Respect. A full driving licence is essential for this post and the successful candidate will be required to undertake our Driver Assessment.

For more information contact Ian Limb on 023 9224 9224.

Applicants should send a CV outlining their salary expectations with two referees.
