

Mechanical Project Engineer

£30,306 TO £37,503 DEPENDING ON EXPERIENCE PLUS BENEFITS

BASED IN HAVANT

Portsmouth Water is one of the leading water companies in England and Wales, consistently being ranked first in the industry for customer service over the past 3 years and at the same time delivering the lowest customer bills, showing our commitment to continually improvement in both technology and performance to meet the needs of our customers.

Engineers have to constantly address new challenges and problems, caused by global warming, ageing infrastructure, population growth and the desire to improve living standards. Portsmouth Water is no different, including maintaining and improving our treatment works assets to ensure continuous high standard water is supplied to our customers.

This work involves refurbishing, replacing and improving our mechanical assets on existing clean water treatment works and distribution network implementing new technologies, and developing solutions / designs with key stakeholders and partners. Project management of both designers and framework partners in a collaborative manner to deliver efficient solutions, and improving operational efficiency of works, whilst ensuring we maintain our high levels of customer service and health & Safety standards.

We are looking for Mechanical Project Engineer who has experience in delivering this type of work, who is committed to building and sustaining collaborative relationships through the right behaviours: promoting innovation, embracing change, encouraging honesty, fairness and pragmatism in an open and supportive relationship with our partners, operating at all times in a professional, considerate manner, and all with a positive attitude.

The new member of our team will work at all times within our values of excellence, respect and integrity, will be self-motivated, show initiative and commitment to positive, proactive health & safety. They will also need a full UK driving licence as the role will require travel to various Portsmouth Water sites. The successful applicant will be required to undertake our Driver Assessment.

We are looking for an engineer that is qualified to degree level and is looking to progress their career and having chartered status or working towards their professional review. Experience of project management and a good knowledge of 2015 CDM Regulations is required. They also need to demonstrate an ability to use their initiative to resolve issues and drive a project to a conclusion.

Other benefits include Company pension scheme, support for professional and academic development and on site gym.

For an informal discussion, please contact Mike Maynard, Senior Project Manager on 023 9224 9260.

Applicants should send a CV with 2 referees outlining salary expectations and including a brief sentence on why customer service and health & Safety is important in the water industry.
