

EICA & Commissioning Engineer

We are looking to recruit an experienced EICA / Commissioning Engineer to provide Electrical Instrumentation Control and Automation (EICA) and Commissioning support throughout the Investment department project delivery life cycle, spanning multiple projects simultaneously.

The role will be responsible for ensuring all projects EICA designs, documentation are compliant to regulations, specifications and scopes, in addition to leading the commissioning phase from the Client's perspective, while supporting the Project Managers to meet deadlines and budget constraints.

The successful candidate will be expected to have experience of the following:

- Creation of EICA scopes and standard specifications.
- Reviewing and analysis of EICA designs.
- Reviewing and challenging EICA project delivery documentation.
- Representing the Client and Project delivery teams at Factory Acceptance Testing (FAT).
- Representing the Client and Project delivery teams at Site Acceptance Testing (SAT).
- Creation and reviewing of project commissioning plans.
- Creation and implementation of outage process risk assessments.
- Ensuring the quality and timely delivery of all commissioning documentation.
- Liaising, supporting and leading the Client during the defect correction period.
- Supporting the project delivery team to deliver required work streams on time, to budget and with sustained system reliability.

Previous experience in working within UK Water industry is preferred, either within a Water Company, consultant &/or contractor. The candidate will be an excellent communicator with a track record of building strong relationships with internal and external stakeholders, companies, contractors and suppliers. Along with a pro-active approach to Health & Safety and customer service, working at all times in line with our values of excellence, respect and integrity. Applicants are expected to hold a full UK driving licence and will need to successfully undertake our driver assessment.

Potential participation in the Production out of hours coordinator (OHC) shall be expected as part of this role. The rota is typically a 1 in 5 week rota, but there may be periods of cover reducing this ratio.

£44k - £55k

If applying externally please include your CV and salary expectations.
