

Infrastructure Technical Advisor/Estimator

We are looking to appoint a Technical Advisor/Estimator to work within the Infrastructure team. You will be delivering a high level of customer service to developers, contractors and external clients. You will be self-motivated with the ability to organise workloads across a number of workstreams to deliver against demanding targets and service level agreements. Reporting to the Senior Contracts Engineer, you will provide cost estimates and assist the designer in the development of schemes for new mains on development sites, mains diversions and network reinforcement projects.

This is a challenging role and you will be required to develop and manage effective relationships with external stakeholders and other departments within the business whilst demonstrating a pro-active approach to health and safety in line with our core values of excellence, respect and integrity

Key responsibilities of the role include

- Receive applications, review site data and reports to inform strategy, hydraulic modelling and project constraints
- Assist in the development of project scope and build robust cost estimates for the design of new developments and water mains diversions
- Work with Land owners and agents to agree access arrangements, compensation and serve notices under The Water Industry Act 1991
- Ensure that all the necessary details, consents and approvals are in place for legal services to produce deeds of grant
- Provide accurate parts list from designs, work with suppliers and our buying team to procure pipes and fittings and issue parts to contractors using IFS
- Collate accurate cost data cross the project cycle and arrange refunds or requests for additional payment from clients
- Provide reports and key performance data to the Senior Contacts Engineer
- Provide support across all planned works functions in a multidisciplinary team to support and promote our CMex and DMex targets

Personal Specification

- Excellent written, verbal and IT skills
- Ability to deliver a high level of accuracy
- Passionate about delivering excellent customer service
- Drive to promote and implement process improvements
- Experience in scope development, project planning and design review for best value
- Knowledge of arrangements relating to pipework and fittings
- Degree level or equivalent in an engineering/construction discipline

For an informal discussion please contact Andy Arnold, Infra & Non-Infra Asset Delivery Manager on 07730 718738.

£29,340 to £32,496 (Grade 5)

Based at Havant

.....
If applying externally please include your CV and salary expectations.
