

LEAKAGE PROJECT ENGINEER

We're making a difference: Together, we can ensure that there is enough water for everyone, now and in the future.

We are looking to employ a Leakage Project Engineer to manage and deliver projects within the Leakage and Smart Networks Department, with the overall aim of further reducing Leakage on our Network.

You will be working closely with other departments, contractors and suppliers, to ensure that projects are delivered safely, on time, within budget and in accordance with PW specifications and scope. Some upcoming projects include DMA subdivision, Bulk Meter Verifications and Satellite Leak Detection.

The successful candidate will be an excellent communicator with a track record of building strong relationships with internal and external stakeholders, whilst demonstrating Portsmouth Waters core values of 'Excellence, integrity and future focus'. It is expected that you will have a proven track in the delivery of successful projects in the Water Industry, and a strong knowledge of Leakage and/or Distribution Networks processes.
