

LEAKAGE ANALYST

We're making a difference: Together, we can ensure that there is enough water for everyone, now and in the future.

We are looking to employ a Leakage Analyst to perform leakage analysis within the Leakage and Smart Networks Department, with the overall aim of further reducing Leakage on our Network.

You will be analysing flow, pressure, acoustic and customer demand data to provide insight to aid leak detection efforts, as well as ensuring that the leakage calculation components are maintained and analysed to ensure high data availability for reporting.

The successful candidate will be an excellent communicator with a track record of building strong relationships with internal and external stakeholders, whilst demonstrating PW's core values of 'Excellence and Integrity'. It is expected that you will have ample experience in Clean Water Leakage Analysis, as well as WaterNet.

What will you be doing?

- Forecasting and reporting demand and leakage profiles
- Analyse complex datasets to provide insight for Active Leakage Control
- Working closely with the Leakage and the Smart Networks Team
- Assist the Leakage Reporting Team with process improvements
- Report and present meaningful information on DMA Demand and Leakage
- Attend industry networking events and steering groups
- Analyse and verify Water Balance components
- Analyse and maintain Household Night Use Datasets
- Improve and manage our Leakage Reporting Software, WaterNet
