

DATA ANALYST

We're making a difference: Together, we can ensure that there is enough water for everyone, now and in the future.

Portsmouth Water is undergoing a major transformation with the implementation of a new CRM system, Kraken.

Kraken is Octopus Energy's revolutionary tech platform based on advanced data and machine learning capabilities and is built around the customer. We are one of Kraken's first water client of the tech platform which is going to allow us to deliver our smart meter programme and secure our current leading position in Customer Service into the future.

To support the company in the successful implementation of Kraken, an exciting opening has arisen for a Data Analyst! This position will play an integral role to support us in maximising the value data through visualisation and reporting tools by profiling, cleaning, and transforming data.

What will you be doing?

Key Responsibilities

- Working with the stakeholders to identify reporting requirements to provide data insights.
- Gathering and compiling data from various sources.
- Ensuring data quality by identifying and correcting inconsistencies in datasets.
- Using statistical methods and analytical tools to interpret data, discover trends and derive insights.
- Presenting findings through visualisations to make complex data more understandable and actionable.
- Creating reports and summaries of analyses for stakeholders, often in a format that is easy to understand for non-technical audiences.
- Utilising techniques like regression, machine learning, or forecasting models to predict future trends or outcomes based on historical data.
