

SMART DATA ANALYST (18-month FTC)

We're making a difference: Together, we can ensure that there is enough water for everyone, now and in the future.

Portsmouth Water are at an incredibly exciting time where we are starting our journey to install smart meters and deliver their benefits to all our customers.

We are seeking an experienced data analyst to join our smart metering programme to design, develop and test the reports and dashboards we need to manage the smart meter operations, and to analyse the range of data we will receive.

Key Responsibilities

- Refining the data requirements to identify what data items are needed in our operational reporting
- Building a data model and data dictionary to map out how data from our meters and applications is linked together
- Designing reports and dashboards to clearly show the operational metrics we need to track to manage the smart metering process
- Building and testing reports and dashboards on our Azure Cloud and Power BI systems
- Analysing and comparing the variety of data sources we have to identify improvements and efficiencies
