

AZURE PLATFORM ENGINEER

We're making a difference: Together, we can ensure that there is enough water for everyone, now and in the future.

Portsmouth Water are undergoing a technology transformation Programme and investing in our solutions hosted on Microsoft Azure Cloud.

We are seeking an experienced Azure Engineer to join our IT team to support and maintain the platform, and work with our development teams create new application and data services on it.

What will you be doing?

Key Responsibilities

- Manage and administer the Azure cloud environment, including provisioning, configuration, performance monitoring, policy governance and security
- Own the dev ops tooling, and support the application in data teams in deploying and securing their solutions
- Migrating existing infrastructure services to cloud-based solutions
- Build platform components as 'Infrastructure as Code' to support our resiliency strategy
- Support cloud adoption of applications as they are being transformed and/or modernized
- Ensure all infrastructure components meet proper performance and capacity standards
- Advise on process improvements and best practice to ensure we are getting the best value and functionality out of our platform
